

# The Savvy Diabetic Personal Medical Resume (All About ME!)

This is IMPORTANT! It speaks for you and has all your essential information in one place, gathered BEFORE an emergency.

DO NOT GET OVERWHELMED! Just organize these items carefully and thoroughly ... you only have to do this complete file ONCE!!!

You might want to create a file on your computer where you keep all these documents ... makes it much easier when you need to update information. It's all in one place

I put each page, back to back, into sheet protectors, figured out the order that I thought might be valuable ... and put them in a clasp folder.

These documents are included in this post, are set up as generic ... you must fill in your own personal information.

It should include the items below (more or less, depending on your needs). I've suggested how you might want to organize these pages but you choose what to include and in what order.

- Page 1, front side: Table of Contents
- Page 1, back side: Copy of most current labs (including HbA1c, kidney, thyroid and lipids)
